						<b>Total Required Credit Hours</b>			<b>120</b>

\*NURS 313, 410, 411 have a clinical component according to the Commission on Collegiate Nursing Education (CCNE) accreditation requirements for the RN to BSN program.

\*\* Since many programs has pharmacology component, then class is typically completed. In these cases, then we recommend taking NURS 311 Pathophysiology instead.

Degree requirements for all RN to BSN students:

- Proof of RN licensure from the National Council Licensure Examination for Registered Nurses (NCSBN)
- Minimum of 120 earned credit hours.
- Minimum of 2.5 GPA at Columbia College

The progression through the RN to BSN program may vary from the sample plan of study. The plan of study is subject to change, based on individualized transfer credit evaluations; additional general education courses may be required if a bachelor in any area or an associate of arts is not completed. General education classes can be taken any time prior to graduation, concurrently, or prior to acceptance.

### Graduation Requirements

The completion of all requirements for graduation is the responsibility of the student. The RN to BSN degree is granted to candidates who have:

- Completed all of the general education and science courses required for the major, attaining minimum of a C in all required science and math courses and English Composition I and II.
- Completed all nursing courses with a minimum of C (70%).
