About Columbia College

Columbia College was founded in Columbia, Missouri, in 1851 and provides associate, bachelor’s and master’s degree programs to more than 25,000 students each year at 35+ locations and online. Columbia College is accredited by the Higher Learning Commission.

Why Columbia College?

It’s simple. Our goal is to make a great education available to you at a great price.

• Six class sessions each year mean that you can complete your degree quickly.
• In-class and online course options (where available) give you the flexibility to fit your degree around your other commitments.
• Our tuition is less than the national average for private and public schools, so you could save thousands on your accredited degree.
• Small class sizes mean more personal attention and help from your expert instructors, all of whom hold a master’s or doctoral degree.

Why complete an environmental studies degree?

Well, if you have a passion for the environment and a desire to protect it, that’s a great start.

Completing an environmental studies degree can help you turn that passion into a career and develop a detailed understanding of the ways in which humans interact with the natural environment.

What does Columbia College offer?

Columbia College offers an Associate in Science in Environmental Studies degree.

What will I learn?

In this program you will complete courses in biology, chemistry, environmental science, politics and ethics, resource management, the history of environmentalism and ecology.
