These figures were sourced from the Bureau of Labor Statistics (U.S. Department of Labor, Occupational Outlook Handbook, 2016-17 Edition, BLS.gov/OOH) and represent the 2016 median pay for these occupations nationally. Earning your degree does not guarantee that you will earn these amounts. Some of these careers require further study at the graduate level.

Let’s talk about how we can help you earn your degree. Call, email or start by applying today!

Columbia College is a private, nonprofit institution that’s been around since 1851. Students look to us when:

• They need a quality, accredited degree but not the debt that often comes with it (who does?). Our tuition is half the national average* and financial aid may also be available to help manage costs and minimize debt.
• They need the flexibility of evening and online classes to fit school around their schedule.
• They need their degree fast, like three and a half years for a bachelor’s or 20 months for an associate.
• Going back to school seems daunting, but less so with small classes, accessible professors and free tutoring services to help with coursework.

*See site for details.
Study psychology
A psychology degree can set you up for success in a huge number of careers.

Want to become a clinical psychologist? Your first step is to complete your bachelor’s degree before continuing on to graduate school.

Want to work in marketing? What could be more helpful than understanding how consumers think?

Want to become a teacher? Your job will be much easier when you know how children learn and develop.

These are just a few examples, but the list is large, giving you a wide range of career opportunities after graduation.

Columbia College offers a Bachelor of Arts in Psychology degree.

What you’ll learn
You will study topical areas such as:
- Human development
- Personality theory
- Neuroscience
- How we learn
- Memory and cognition
- Emotion
- Sensation and perception
- Relationships
- Abnormal behavior
- Psychotherapy
